

We are looking for experts

Driven by passion to extend the limits!

Expand our competencies in **engineering & testing**

- concept design & simulation modelling
- software & FPGA development
- hardware development & PCB design
- mechanical development
- testing and validation

We are BRUSA Technology

We find joy in developing efficient solutions

In keeping with the values of our founders, we are passionate about developing groundbreaking electromobility solutions and creating sustainable added value. Our quest for efficiency is equally beneficial for our customers, society and the environment. We put new ideas in motion and grow side-by-side with our customers.

WATCH OUR BRAND VIDEO!

eMotion with expertise

Our experienced team approaches challenges in a focused and responsible manner, and we are continuously expanding the expertise held within the team. The innovative technical approaches that we take are critical in the creation of compact, lightweight and efficient products. Thanks to the precision, passion and many years of experience within our team, we guarantee a high level of product maturity – right from the very first phase of development.

Tailored solutions that are electrifying

We are experts in the electrification of sophisticated drive systems, as part of which we attach the highest priority to ensuring that all of the components work together optimally. From the conception phase to the production phase and from the energy source to the drive axle, we develop tailored solutions. This way, we help our customers to be successful and are constantly promoting innovation.

Do you have the same drive as we do?
